I was completely enchanted from minute one. How can this game be just \$1!? Underpriced game of the year?. Its a pretty challenging game. Something to note is that this isn't anything super special, but its still fairly fun. The controls are... interesting and the UI can be kinda awkward, but I do like the concept and the game isn't bad.. Pure cancer. xD. Buy if you like the nostalgia of old Flash games. It's good to kill time.

Cons: Does not tell you the controls right off the bat, and when you do find them, it's kind of awkward to do the shift in the game as well as jump, which is heavily required. Jump is on Z and the shift is on Shift. I would have preferred for Jump to be the Up Arrow key, like the Flash games this was inspired by.. challenging, I like it. Truthfully, I never normally play these types of games, but so far I'm really liking this game!

It's so cute, it's interesting, it's simple, and has dope\music.

You should play it, it's a fun lil game

The game's saving feature is its price, which should give you a pretty good indication of its length and complexity. It would sorely benefit from some in-game tutorials to get you acquainted with the controls and obstacles in the environment. As it stands, it can devolve into a bit of frustrating trial and error as new ideas are introduced but not explained. But despite that, the low price suggests that the developer knew what the game's limits were and that it's just a fun time waster (and it is fun when you start to get the hang of it). And that's a lot more integrity than many developers have, who will regularly charge more money for less of a product than even this.. Cool, really cool.

BUT

IT

IS

INSUFFERABLY

HARD. Refund. Thanks.
