Fail. best Cardio Workout 10/10. wow... bad on so many levels. it just doesn't work. for \$1 though, dont know what i expected.

I bought this game because of flash game nostalgia from 2004, and you probably did, too. This is NOT what you're looking for. I don't know how they managed to ♥♥♥♥ up the mechanics to simple stick figure game, but the controls are just butchered. I dunno, I feel like the creator is depending on flash game nostalgia, but this is not even as fun as a flash game. I'd rather play Stick RPG or something.

Feels uninspired, controls weird, don't buy it.. Most likely this game is not free because now adays VR headsets are expensive so I would not recommend the game unless you have a couple-hundred dollars lying around for a VR. Does not retain clock settings and a few other settings from one startup to the next. Crashed when I attempted to change opening book. 3D boards did not work on Windows 7 32-Bit with Nvidia 3100M graphics card with 256 MB of video memory. The Nvidia 3100M, although a business class card, has run all other video games extremely well. Couldn't find where to turn off the bloody arrows. I kept turning off "Spy," but that was not apparently the correct setting to turn off the arrows. I'm 1800 USCF strength -- I know how the pieces move!

The interface has changed greatly since the days of Chess Tiger 14 and Hiarc8 on disk. I have both. Seeing what has happened to the Fritz interface since then is like going to your high school 5-year reunion and seeing the short, skinny, and very cute ginger tomboy who sat next to you in English class whom you always regretted never asking for a date waddle in weighing about 450 pounds. You drop your drink, wet your pants, run screaming out of the reunion, and vow never ever to get married.. Cannot see a cursor within the game window....impossible to play. FIXED

Now I have about a hundred questions.....

1. Where do my aircraft come from?
2. Do they fly ONE route or can I get them to service multiple routes?
3. Which routes are the profitable ones?
4. Why am I bothering with this?

....

....

98. A guide V manual V information would be nice. Any chance?

99.

100. Remind me, someone, how do I refund this?. Overall this is a pretty good addon. The only reason I bought this is for the Tundras, The J-3 with that set of gear wont start and when it is started it shuts down mid flight..... Had to buy instantly. No crashes and you can force AA from the desktop. It's good to be back.. Surprising game that is quick to pick up and start playing, and hard to put aside. I really like how you get to go through all these different kinds of levels, especially when you play hard core mode - some levels are really crazy!

Solid plus:

- Very challenging through time limit and difference in level-types. I love the mirrors.
- Funny and cute characters.
- Nice art.
- Cool music.
- Easy peasy to learn, but some levels will give you a challenge (so rewarding to finally get a 1-block jump right though!)

Room for improvement:

- It sometimes feels hard to anticipate how far you can jump - especially on the 1 blocks (or maybe I'm just a tad bad at it and will get better :P)

I can't wait to give the multiplayer mode a spin with friends. I feel that this game will really shine in multiplayer on game nights. Excellent party potential right here.

You can legally play this with one hand.. this game sucks. waste of money. should be returned for waste of tiome.. best gmae evah. I'm not a fan of remixes, but this music got me all pumped up!. Relaxing music, stunning graphics, a simple puzzling concept. An excellent game to play as you 'unwind' from your day!. Bad Caterpillar is a silky smooth fast paced spiritual successor to Ataris 1980s classic Centipede.

With vibrant coulors, easy to learn controls and the addition of many power ups to add to your arsenal of insect extermination. This game dose have a major bug problme but in the right places :P

Its great fun for 79p.

Hell I would even call it better then centipede.. Tim is the most generous mentor I've seen so far. His tutorials have always been brief, concise, and easy to learn; which tremendously help me improve and became my road to Ubisoft. Thank you Tim for sharing your knowlege. I will continue patronizing your tutorials :). Great game! i had trouble with the sound working right, but im a die hard dirt racing fan so i got over that real quick! Ai is okay sometimes, career mode youll pretty much win every race by laping everyone once or twice wish there was a little more challenge there but if you like dirt track racing this is the game! Fun game overall, out of the handful of dirt track games ive owned this ones right at the top.. The good:

It's a classic side scroller. The graphics are really crisp and sharp. It can be beaten without tricks. The enemies are varied, as are the weapons. Stages are varied, although more so in the second half of the game. It'd be a game you could let your kid play. The longer you play, the more you'll get used to the controls and enjoy playing.

The bad:

It's got some bugs. It suffers from a severe lack of polish. Some levels you'll have to restart simply because you used keys on doors that are pointless (trial and error). The controls take a bit to get used to due to a weird jump that has you glide down.

Overall, it's not one I'd recommend, but it's not as bad as some of the reviews indicate. I mean, if you got it for a dollar or two...it's worth it.. Bad optimization. Game lagging on weapon reloading.
