At the BIOS password prompt ('PASSWORD = '), press and release the following keys, one after another: Ctrl, Tab, Ctrl, Enter. The computer's response should be: PC Serial No.. If an unrelated malfunction exists that causes engine starting to be disabled or otherwise unavailable, learn mode will not exit and DTC P0633 will remain current.. If the calculated response from the TDM equals the calculation performed by the ECM, the ECM will allow vehicle starting.

DTC P0633: Theft Deterrent Key Not Programmed When learning the pre-release password, as well as the challenge and

response sequence, the engine control module (ECM) is placed in learn mode.. In this case, 'key' is referring to the challenge response DTC P0633 requires a successful engine start to exit the learn procedure and clear the DTC.. Once the password and challenge/response are learned, learn mode will be exited when the engine is successfully started.. DTC P1629: Theft Deterrent Fuel Enable Signal Not Received The theft deterrent module (TDM) sends the pre-release password to the engine control module (ECM) via the serial data circuit.. At this point, the DTC will be cleared If the ECM does not exit learn mode, P0633 will remain current and indicate a fault.. Toshiba Challenge Code Keygen Generator DownloadOmnisphere Challenge Code Keygen CrackToshiba Challenge Code Keygen Generator DownloadThe 'key' referenced in the DTC descriptor does not refer to the vehicle key.. This DTC should not be used as a fault indicator, but rather as a symptom to assist in the diagnosis of these other systems.. DTC P1629 is an indicator that the challenge response was not received within the required 2 second window.. In this situation, the cause of the inoperative engine starting must be corrected before diagnosing DTC P0633. 773a7aa168
